Tic Tac Toe w/ bot

	Urgent	Not Urgent
Important	● Get user input in terminal ● Show board after every move ● Develop a simple bot that draws every time	● Make a bot w/ reinforcement learning ● Have a file store weights for the AI ● Store moves in a CSV file
Not Important	● Use java's simple syntax for move validations ● Use terminal as the graphical interface ● Use bash for user/file I/O	● Fancy AI algorithms (such as querying LLMs or something) ● GUIs ● Server/client interaction
